FIRE in LINCOLN'S-INN.—The importance of constructing the FLOORS and CEILINGS of buildings FIRE-PROOF, has been strikingly exhibited at the recent extensive fire in Lincoln's-Inn, where the absence of any precaution of this kind has led to the destruction of deeds of very considerable importance, and property of great value. The proprietors of the Patent Flooring offer the advantage of a fire-proof building at a cost not exceeding that of the ordinary mode of construction; and by the adoption of this improved method of building, greatly increased strength and durability are combined with perfect security to life and property. Apply to Messrs FOX and BARRETT, Leicester Chambers, 40, Leicester-square.

CLEANLINESS is necessarily at all times conducive to health, and this, as well as economy, is greatly promoted by substituting for the noxious process of painting with oil and white lead, STEPHENS'S DYES for STAINING WOOD, as a SUBSTITUTE for PAINT, for decorating churches, large public rooms, and theatres, as well as private dwellings. Where economy in expenditure of material and time is of importance, these Dyes will be found of the utmost advantage, as they give a rich colour to plain woods, while they reflect all the beauty of the natural graining, which is so superior to imitations by art, and, at the same time, avoid the disagreeable smell and deleterious consequences of paint. The Dyes, or Stains, are prepared and sold by HENRY STEPHENS, 34, Stamford-street, Blackfriars-road, London, in bottles at 6d. and 1s. each, and 4s. 8s. per gallon. The Oak, Walnut-tree, and Satin Wood Colours may be obtained in powder at 4s. per lb., which dissolves in water to form the liquid, and 1 lb. will make one gallon of stain.—N.B. The trade supplied. Sold also at the office of "The Builder," 2, York-street, Covent Garden, London; at both which places may be had the proper Varnish and Size with directions for their use.
